SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Safety and Health Act of 1970 (the Act) authorizes the promulgation of such health and safety standards as are necessary or appropriate to provide safe or healthful employment and places of employment. The statute specifically authorizes information collection by employers as necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents.

Section 1910.266(i)(10)(i) requires an employer to verify that employees have been trained in the safe performance of assigned work tasks, first-aid and CPR by preparing written certification records. Section 1910.266(i)(10)(ii) requires an employer to maintain the certification records.

The training certification is necessary to assure compliance with the requirement that employees have been trained in the various precautions and safe practices in logging operations. The information collected would also be used by compliance officers to determine that employees have been properly trained according to the requirements set forth in 29 CFR 1910.266(i).
